EXPERIENCE

Founder

May 2026 – Present

Hordi Nails

Own home nail studio · Upplands Väsby, Stockholm

- Designed the brand (wordmark and monogram) and built hordinails.com: gallery, price list and an online booking flow with a price and duration calculator.
- Built the booking backend on Cloudflare Workers: requests arrive in Telegram with confirm, suggest and decline buttons, clients get emails and a reminder the day before.
- Set up local and AI-search visibility: NailSalon, offer and FAQ structured data, sitemap and an llms.txt file.
- Building a reel pipeline (Kokoro TTS, Whisper, Remotion, FFmpeg) so content does not depend on filming clients.

Co-Founder & Head of Marketing

Nov 2026 – Present

ICPress — Individual Contributor Press

StoryPop AB · Platform for comparing companies with their real peers

- Ran the marketing audit and repositioned the product around fair, apples-to-apples company comparison; planned a waitlist-first launch and comparison-led content.
- Wrote and filed product issues detailed enough for the developers' AI coding agents to fix as-is: URL and user state, element IDs, measurements, cause, fix and acceptance checklist.
- Created "Finance from zero", a short-video series for beginners, and built the engine that renders episodes from scripts with TTS narration and timed captions.

Marketing Coordinator

Aug 2026 – Present

Voxear Technologies AB

B2B hardware company · Professional hearing protection

- Built the company's first documented brand system in Figma from a ~95-file audit — identity, design tokens, custom icon set and tone of voice — and won leadership approval on the most contested decisions with a research-backed case.
- Unblocked a stalled retail-display redesign by documenting defects and agreeing print specs with the external production vendor.
- Built buyer personas for 7 segments mapped across a 6-stage buyer journey, and set up the first social media baseline, content calendar and customer proof bank.
- Ran the first SEO, web performance and AI-search visibility baselines, turning findings into a prioritised workstream for leadership.
- Built an internal issue-tracking tool from scratch to give leadership real-time visibility into open marketing and operations issues.

Growth Marketer

Sep 2025 – Jun 2026

Ivy Interactive

Early-stage B2B startup · Stockholm / Remote

- Managed LinkedIn outreach workflows — lead segmentation, campaign variations, reply tracking, follow-up preparation.
- Applied AI to automate outreach: reply categorisation, sentiment analysis, lead prioritisation, follow-up drafting.
- Analysed campaign replies to identify audience patterns, objections and messaging gaps.
- Prepared landing page drafts and product messaging concepts in Figma and Canva.
- Supported content operations in Storyblok CMS and monitored community channels.

UX/UI & Product Designer

Jun 2025 – Dec 2025

SpaceCorps Technology OÜ

Early-stage browser game startup · Remote

- Designed the company website and visual presentation in Figma, shaping early brand identity.
- Created UX/UI concepts and prototypes for the browser game MVP.
- Defined visual identity direction — colour system, typography, and component patterns.
- Worked directly with the founder in a fast-changing product environment.

Digital Marketer

Jan 2025 – Apr 2025

Beredskapslyftet

Swedish employment integration initiative · Stockholm

- Built and managed Facebook and Instagram presence from the ground up.
- Produced visual content and short-form videos in Canva and CapCut.
- Covered organisational events — photography, speaker documentation, interviews.
- Supported Meta Ads setup including audience targeting and campaign configuration.

Founder & Operations Lead

2023

Ukrainian Media Localisation Initiative

Independent project · Remote · Volunteer

- Founded and led a remote volunteer team of ~30 contributors across translation, voice, and post-production.
- Designed and managed production workflows across multiple parallel workstreams.
- Delivered 3 complete localised episodes from concept to final release.
